BLACK SOIL
URBAN FARM

The Broccoli that your Kids will actually eat, and so will you !!!

The Brassicaceae microgreens are well known and valued for cancer-fighting glucosinolates and carotenoid phytochemicals.

Serenade your taste buds with Cantaloupe Micros

Can you say FRESH? Well these sweet melon and slight cucumber tasting microgreens are surprisingly fresh. While they can be mistaken as sunflower micros at certain stages, cantaloupe microgreens are less crunchy and more juicy. Perfect addition to any smoothie.

Draw "FIRST BLOOD" when you bit into these spicy greens

Rich in essential amino acids and chlorophyll which has all sorts of benefits from cancer-fighting properties to digestive aid.

Increase digestive capability and reduce fibroid cystic growths, clear sinuses & sore throats, indigestion, abdominal swelling, and more. Live your best life with garden grown food.

Sweet Peas

Organic speckled pea seeds are great for stir fry to juicing and are great in salads by itself. The shoots have a delicious, nutty and distinct sweet pea-like flavor.

Brighten your day with Sunnys

Put a new twist on sandwiches & wraps, soups, salads, scrambled eggs, and green juice smoothies.

Support a heart-healthy diet and increase immunity, reduce inflammation, and increase energy with organic black oil sunflower seeds.

Boost into your day with your own Wheatgrass Shots

Our Wheatgrass was grown with two customers in mind: the pet owners to use as pet grass and those who are looking for their daily health boost.

****This product is the actual Wheatgrass not the liquid.
